The examination of aerial photographs/images for the purpose of identifying objects and judging their significance.

Principals and Elements of Image Interpretation

Image interpretation is a complex process. It depends on scale of photograph, experience of interpreter, terrain conditions, objects, spectral band etc. In reality objects are observed in a 3-Dimensional way. However, in photographs all objects are flat and 2-Dimensional.

7 Elements of Image Interpretation | Remote Sensing and ...

The colors in an image will depend on what kind of light the satellite instrument measured. True-color images use visible light—red, green and blue wavelengths—so the colors are similar to what a person would see from space. False-color images incorporate infrared light and may take on unexpected colors.
