comprehensive range of Multi-Split condensing units, right from System 2 (1 outdoor to 2 indoors) up to System 3. In addition, each of the product range has various cooling/heating capacity combinations. Only 1 outdoor is need to couple with 2 or more indoors. Thus, this has effectively improving the floor space utilisation.

Acson CoolRow is a compact design precision air conditioner designed to couple with multiple air flow (hot or cold air) in order to improve air circulation and efficiency. CoolRow are integrated in the rows of server racks that greatly enhance air distribution and taking cooling directly to the heat load.

Acson Chilled Water
System works by using
air to cool down the

Access Free Air Cooled Product System Accson

refrigerant circuit. The cooled refrigerant is then circulated to a Brazed Plate Heat Exchanger (BPHE) where heat exchange takes place to cool down the water. The chilled water is then circulated to the Fan Coil Unit (FCU) for cooling in desired place.
