Home • Disaster Recovery Journal

Disaster response is the second phase of the disaster management cycle. It consists of a number of elements, for example; warning/evacuation, search and rescue, providing immediate assistance, assessing damage, continuing assistance and the immediate restoration or construction of infrastructure. The aim of emergency response is to provide immediate assistance to maintain life, improve health and support the morale of the affected population. Such assistance may range from providing specific but

Disaster response - Wikipedia

Disasters, both natural and human-caused, affect people and communities in different ways. As you begin to rebuild and recover, remember that it is very common for disaster survivors to have reactions to their experiences. Disaster survivors may show physical and emotional signs of stress, and disasters may affect them financially.
