### Discounting Libor Cva And Funding

The subject of the book (Discounting, CVA, Funding) is timely given the changes in quantitative finance over the last 5 years. The short book introduces the different subjects. For a short book it tries to cover too many subjects. I bought the book mainly for the discounting part (the so-called OIS discounting or multi-curves framework).

Libor, besides its name, is not a good proxy for uncollateralised funding. In fact, a large bank I worked for had an uncollateralised funding curve which was a a spread of +100bps to Libor. The fact that it was a spread to Libor was for legacy reasons and easier to adopt to existing systems.

## **fixed income - Discounting for XVA - Quantitative Finance ...**

Discounting, Libor, CVA and Funding explains details of Basel III that are important for pricing, especially around the CVA VaR and default exposure capital charges. This book will be required reading for quantitative practitioners who need to keep up-to-date with the latest developments in derivatives pricing, and will also be of interest to academic researchers and students interested in how instruments are priced in practice.
