Biodiversity Study Guide

Chapter 10 Biodiversity - Chapter 10 Vocabulary. Brightstorm: Biodiversity (3:46) Biodiversity is the amount of variety of organisms in a particular area and is typically used to measure the "health" of an ecosystem. Biodiversity usually encompasses genetic diversity (variations within individual populations), ecosystem diversity (within ecosystems) and landscape diversity (range of differing ecosystems within an area).

pdesas.org

Introduction. As tropical rainforests contain half of all biodiversity, regulate global climate, purify air and water, and serve as a source of resources for local communities, they are crucial to the health of the planet (Gibson et al., 2011; Nolte et al., 2013). However, widespread deforestation has reduced tropical forest cover by half over the past fifty years, with a net loss of 1.5 ...
