...

In linguistics, morphology (/ m ɔːr ' f ɒ l ə dʒ i /) is the study of words, how they are formed, and their relationship to other words in the same language. It analyzes the structure of words and parts of words, such as stems, root words, prefixes, and suffixes. Morphology also looks at parts of speech, intonation and stress, and the ways context can change a word's pronunciation and ...

The Grammar of Words: An Introduction to Linguistic Morphology

Divide the following words into the smallest meaningful units and describe how the words are formed, i.e. describe the morphological processes (derivation, inflection) involved.

Example: unhappiness The root is "happy". By adding the prefix "un-" to the root "happy" we derive "unhappy". The morphological process involved is called derivation.

Morphology Exercises

This book introduces the reader to the basic methods for the study of the internal structure of words, and to the theoretical issues raised by analyses of word structure concerning the organization of the grammars of natural languages. Data from more than sixty languages are used to illustrate these descriptive and theoretical issues.
