Kanban Just In Time At

The Kanban system fundamentally facilitates the implementation of Just-in-Time. It serves as the guide within the production floor on what and when to work on an item. With Kanban's visual manner of relaying information, companies are able to better monitor and manage the flow of work-in-progress, goods, and demand requirements within the process.

Just in Time Inventory System | Kanban Zone

Kanban is a concept that relates to obtaining materials or required items "just in time" for their introduction into the assembly or process. The system of JIT or the just in time process was initiated by the Japanese firm Toyota in the 1940s. Kanban is a system to signal a need for action. This can be done by cards on a board (which is the traditional way) or by other devices that are used as markers, indicating the need to take action.
