Managing Supplies In an Operating Room Environment

Operating room management is the science of how to run an operating room suite. Operational operating room management focuses on maximizing operational efficiency at the facility, i.e. to maximize the number of surgical cases that can be done on a given day while minimizing the required resources and related costs. For example, what is the number of required anaesthetists or the scrub nurses that are needed next week to accommodate the expected workload or how can we minimize the cost of drugs u
