Michael Sipser Solutions | Chegg.com

Instructor’s Manual Chapter 0 Here is a sketch of the solution. Make two piles, A and B, of nodes; initially empty. Then, starting with the entire graph, add each remaining node to A if its degree is greater than 1/2 of all remaining nodes and to B otherwise, then discard all nodes to which it isn’t (is) connected if it was added to A (B).

Instructor’s Solutions Manual for Introduction to the ...
Solution: by part (a), I can always split D into B and A which both are infinite and disjoint regular subsets. And similarly, I can split A into A 1 and A 2, both of them regular infinite and disjoint. Consider C = B ∪ A 1. Of course C is regular (union of two regular languages is regular) and infinite.
