smaller, lighter (probably cheaper) engine made to fit the 318. CFM56 and IAE V2500 engines are really too big. Even if they are electronically derated to fit the 318, then they are still equally heavy. And that extra weight is a disadvantage. On the other hand fleetwide engine commonality is a maintenance advantage.

PW6000 - Failure? - Airliners.net

The Pratt & Whitney PW2000, also known by the military designation F117 and initially referred to as the JT10D, is a series of high-bypass turbofan aero engines with a thrust range from 37,000 to 43,000 lbf (160 to 190 kN). Built by Pratt & Whitney, they were designed for the Boeing 757. As a 757 powerplant, these
