The Self-Assessment Manikin (SAM) is a non-verbal pictorial assessment technique that directly measures the pleasure, arousal, and dominance associated with a person's affective reaction to a wide variety of stimuli. In this experiment, we compare reports of affective experience obtained using SAM, which requires only three simple judgments, to the Semantic Differential scale devised by Mehrabian and Russell (An approach to environmental psychology, 1974) which requires 18 different ratings.

directly measures the pleasure, arousal, and dominance associated with a person's affective reaction to a wide variety of stimuli.

## **MEASURING EMOTION: THE SELF-ASSESSMENT MANIKIN AND THE ...**

The Self-Assessment Manikin (SAM) is a picture-oriented questionnaire developed to measure an emotional response (Bradley and Lang 1994). The questionnaire is designed to measure three features of an emotional response that have been identified as central to emotion in research conducted by Lang and colleagues (Lang et al. 1993).

### **Self-Assessment Manikin**

The Self-Assessment Manikin (SAM) is a non-verbal pictorial assessment measuring the pleasure, arousal, and dominance associated with a person's affective reaction to stimuli.

### **Self Assessment Manikin (SAM)**

The Self-Assessment Manikin (SAM) scales developed by Bradley & Lang in the 1980's are a pictorial rating system to obtain self-assessments of experienced emotions on the dimensions affective valence, dominance and arousal. A paper-pencil or computer based version can be used in an experimental procedure. Due to the non-verbal design it is usable regardless of the age, educational or cultural background of the probands.

### **Self-Assessment Manikin (SAM)**

The Self-Assessment Manikin (SAM) is a pictographic scale to assess emotion in three independent affective spaces which are valence, arousal and dominance. Moreover SAM scale pictorial representation being a more human like figure may direct to further reliable decision on perceived emotion [ 9 ].
