Plotting Sheets - Maryland Nautical

The plotting sheet can be used as a usual nautical chart, for plotting course lines, lines of position, positions of the vessel etc. As in all Mercator charts, distances are obtained from the left- or right-hand scale of

Plotting Sheets

Using the dividers place one point of the dividers where N 27° intersects with W 025°. Place the other point of the dividers horizontally across the N 27° line of Latitude and make a tiny mark. This second point is the location of the Ap λ W 025° 58' (remember- for ease of plotting the 57.5' was rounded up to 58').

Procedure- plotting a Line of Position - Nautical almanac

As mentioned in the video, you will need a plotting sheet and your completed sight reduction form. You can get the forms from this blog post: Equipment Required. Step 1 & 2. First of all you need to mark up the plotting sheet with the latitude and longitude of your area – using your DR or AP position as the middle of the sheet.

13.5 x 14 inches. These are effectively just blank charts of the ocean — or of any other part of the world. The "universal" nature is that the lat and lon labels are not marked on the sheets, so we can set them up for any location on earth, and for any scale we choose. They could be set for 3 inches = 60 nautical miles, which is the "default" implied by the printed tick marks, or for 3 inches = 6
